

General configuration

Confluence setup

Confluence title *

Confluence

Allows you to specify the Confluence title which will appear on the browser title bar.

☐ Display this title on the navigation bar

Favicon

Choose a PNG, JPEG, or ICO, at least 48 x 48 pixels, and max 2MB. After uploading and saving, it may take a page refresh for the browser icon to display.

Select file to upload or drag and drop here

Customise your navigation logo and colour scheme from [Look and feel > Customise navigation](#).

Contact administrators message

Please enter information about your request for the site administrators. If you are reporting an error please be sure you include information on what you were doing and the time the problem occurred.

Allows you to configure the message that is shown to a user when they try to contact the Confluence administrators. This should be entered using wiki markup.

Not defining a message will lead to the default message being displayed.

Hint: This field can be formatted using wiki markup. [Learn more](#)

☒ Contact administrators form

Display a contact form when trying to contact the confluence-administrators. This can only be turned off if there is a custom contact administrator message.

Confluence landing page

Confluence home

Set the default starting place for your users.

☐ Convert pages automatically

Automatically convert all pages for full conversion to the cloud editor. [Learn more](#) about converting pages.

☐ Editor full-width

Enable full-width as the default for new pages and live docs.

☒ Email notification

When notifications are turned off at the Confluence level, no emails are sent for any activity. Users won't be able to turn notifications on.

☒ Push notification

When notifications are turned off at the Confluence level, no push notifications happen in the Confluence mobile app for any activity. Users won't be able to turn notifications on.

☒ Likes/reactions

Enabling this will allow users to like/react to pages, live docs, blogs, comments, and other content.

☒ Avatars on published content

When turned on, viewers can see who else is viewing published pages and blog posts. [Learn more about avatar visibility](#)

Internationalization

Set the default language for this Confluence instance.

Global default language

English (UK) 

This will only affect users if their browser does not send a language to Confluence, or if language detection is turned off by setting the `confluence.browser.language.enabled` property to false. This feature is currently in development. [Learn more](#)
